

Building

FRANCHISE

B

Building

Building platform is designed to bring together the construction industry in one place in the fastest and most efficient way. Easy communication and removal of physical barriers allows you to communicate with anyone from the industry immediately as needed.

It reduces costs and increases efficiency for construction companies that do not have time or money to invest in their own IT infrastructure.

Companies can simply present their portfolios and find clients online without having the need for their own web site, digital advertising and all the other modern tools that benefit the business.

WHY BECOME A BUILDING FRANCHISEE?

With the rapid development of system digitization, changes are needed in each industry in certain business segments.

- Easier communication and workflow
- Seizing your potential
- Access to the know-how

Imagine what all the possibilities would be for all construction companies in a country if they could find the required information, goods, tools, subcontractors or specialists in a certain area at any time?

Building aims to create a unique database that will include all participants in the construction industry so that all of them will be able to find the necessary information about jobs, ongoing projects, supply and demand for goods, services, tools, etc.

In this way, we want to raise the organization of the entire construction industry and increase efficiency and productivity at the level of the entire country.

Finding partners

Building is on the lookout for Partners to join our Franchise: so contact us to see if Your country is among our areas of interest as well!

We expect to increase our franchise network significantly throughout 2023 following our strategy.

Building will continue to expand our geographical coverage by inviting potential partners to join the platform in order to advance the construction market together.

With the right partners, we at Building can successfully continue increasing business scope, and further, grow our global presence through strong strategic alliances.
